

# Nature's Guardians!

Match the Mission with the activity that helps achieve it.

NAME: \_\_\_\_\_

DATE: \_\_\_\_\_

## Mission

## Activity

1. Protecting wildlife habitats

2. Caring for injured animals

3. Educating others about conservation

4. Helping people in need

5. Promoting sustainable practices

6. Supporting wildlife research

7. Encouraging recycling

8. Preserving natural habitats

9. Promoting wildlife-friendly gardening

10. Advocating for environmental policies

A. Participating in a citizen science project to monitor bird populations

B. Writing letters to local officials urging them to protect endangered species habitats

C. Installing bat-friendly lighting in public areas to minimize light pollution and protect nocturnal wildlife

D. Participating in a community tree-planting event to create wildlife corridors and restore habitat connectivity for local wildlife populations.

E. Organizing a nature-themed art contest for local schools

F. Creating a butterfly garden with native plants to attract pollinators

G. Participating in a beach clean-up to remove plastic pollution

H. Organizing a neighbourhood recycling drive for paper, plastic, and glass

I. Assisting with a community garden to provide fresh produce for families in need

J. Volunteering at a wildlife rehabilitation centre

Skills: Spelling, Problem-Solving, Cognitive, Perseverance and Focus, Knowledge Acquisition, Analytical Thinking, Cultural Literacy

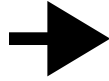

# Answer Key

## Mission

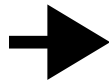

## Activity

1. Protecting wildlife habitats

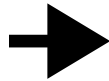

Participating in a community tree-planting event to create wildlife corridors and restore habitat connectivity for local wildlife populations.

2. Caring for injured animals

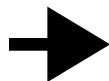

Volunteering at a wildlife rehabilitation centre

3. Educating others about conservation

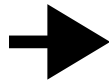

Organizing a nature-themed art contest for local schools

4. Helping people in need

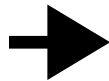

Assisting with a community garden to provide fresh produce for families in need

5. Promoting sustainable practices

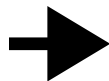

Participating in a beach clean-up to remove plastic pollution

6. Supporting wildlife research

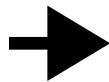

Participating in a citizen science project to monitor bird populations

7. Encouraging recycling

Organizing a neighbourhood recycling drive for paper, plastic, and glass

8. Preserving natural habitats

Installing bat-friendly lighting in public areas to minimize light pollution and protect nocturnal wildlife

9. Promoting wildlife-friendly gardening

Creating a butterfly garden with native plants to attract pollinators

10. Advocating for environmental policies

Writing letters to local officials urging them to protect endangered species habitats
